Have you checked for

For File/Class
❑Dead/Redundant code ❑Duplication ❑Is there Global State ? ❑Dependencies (added/changed) ❑Is it Tell or Ask ? ❑Is Inheritance Correct ? (Liskov Substitution)

For Function
❑Complexity (cyclomatic, large functions, block depth) ❑Assumptions and Side effects ❑Law of Demeter Violations ❑Is it Handling Errors ? ❑Is it easy to Misuse ? ❑Is it "failing fast" ?
